INDEX OF SUBJECTS AND AUTHORS

Abdominal lymph nodes, calcified lesions in the tracheobronchial, cervical and, The relative incidence of, 336

Accident, industrial, Tuberculosis as an, 767

Accomplishments of the National Tuberculosis Association, The scientific basis of the program and the, 249

Acid-fast microörganisms, Studies on. III. The reactions of the white blood cells of the guinea pig following inoculation with human tubercle bacilli, 462

Acid-fastness, regeneration of, The, in apparently degenerated tubercle bacilli, 630

Activity, Factors in the pathogenesis of tuberculosis, with a preliminary discussion of, 208

—— in tuberculosis, test for, The resorcinal flocculation, 843

Acute and chronic anoxaemic cardiac syndrome in chronic pulmonary tuberculosis, The, 447

Address of the President. Relapse in pulmonary tuberculosis, 1

Adrenalin injections in tuberculosis patients, cardiovascular reactions following, Composite curves of, 626

—— reaction in tuberculosis patients, A study of the, 616

Alcohol-soluble antigen of tubercle bacilli, carbohydrate content of the, A note on the, 502

Allergic reaction, Exudative and proliferative processes not a basis for classifying tuberculosis into types but represent different phases of, 580

Allergy and clinical phthisiogenesis, The X-ray evidences of, 590

Anoxaemic cardiac syndrome in chronic pulmonary tuberculosis, The acute and chronic, 447

Antigen, alcohol-soluble, of tubercle bacilli, carbohydrate content of the, A note on the, 502

Aolan, intracutaneous injection of, The leucocytic reaction of the tuberculous patient following the, 839

Artificial pneumothorax after fourteen years, 804

—— ——, Explaining, to the patient, 114

—— ——, hypotensive, and especially simultaneous bilateral pneumothorax, General remarks on, 109

—— —— in pulmonary tuberculosis with special reference to mobility of the mediastinum, A critique on, 117

(Atelectasis), Massive collapse, associated with pulmonary tuberculosis and tumor, 7

AUSTRIAN, CHARLES R. Remarks on the clinical diagnosis of pulmonary tuberculosis, 37

Bacilli, tubercle, carbohydrate content of the alcohol-soluble antigen of, A note on the, 502

——, ——, degenerated, The regeneration of acid-fastness in apparently, 630

——, ——, from various sources, Comparative yields of water-soluble protein and carbohydrate from. The chemical study of bacteria. XXXIII, 505

——, ——, human, white blood cells of the guinea pig following inoculation with, The reactions of the. Studies on acid-fast microörganisms, III, 462

——, ——, Immunological studies on various fractions of, 497

——, ——, in various organs, fate of, The, 672

Bacillus, tubercle, cultivation of the, Further studies on the, 661

——, ——, developmental cycle of the, as revealed by single-cell studies, The, 815

——, ——, filterability of the, The, 823

BARNES, HARRY L., AND LENA R. P. The duration of life in pulmonary tuberculosis with cavity, 412

Basis, scientific, of the program and the accomplishments of the National Tuberculosis Association, The, 249
BAUM, FELIX, MEBEL, SOL, AND KANE, ALLEN. The fate of the tuberculous cavity, 596
BAYLIS, ADELAIDE B. The Vernes flocculation test for tuberculosis, 513
——, —— ——., AND MACNEAL, WARD J. The resorcinol flocculation test for activity in tuberculosis, 843
Bilateral pneumothorax, simultaneous, General remarks on hypotensive artificial pneumothorax, and especially, 109
Blood volume and pulmonary tuberculosis, 832
Breath-sounds, normal, origin of the, place of, The, 205
Bronchial irrigation, 435
Broncholithiasis, 430
Bronchus, Tuberculous granuloma of the, 425
BRONFIN, I. D., AND SIMON, SALING. Observations on some cardiac lesions coincident with pulmonary tuberculosis, 727
BROWN, ROBERT W., GOLDBERG, BENJAMIN, AND SWEANY, HENRY C. Pathological studies on tuberculous enteritis, 744

Calcified lesions in the tracheobronchial, cervical and abdominal lymph nodes, The relative incidence of, 336
—— pulmonary foci, The incidence of roentgenographically observed, and their significance, 344
CAMP, WILL, LUTON, F. H., TOMPKINS, EDNA H., AND CUNNINGHAM, R. S. Studies on acid-fast microörganisms. III. The reactions of the white blood cells of the guinea pig following inoculation with human tubercle bacilli, 462
Carbohydrate, Comparative yields of water-soluble protein and, from tubercle bacilli from various sources. The chemical study of bacteria. XXIII, 505
—— content of the alcohol-soluble antigen of tubercle bacilli, A note on the, 502
Cardiac lesions coincident with pulmonary tuberculosis, Observations on some, 727
—— syndrome, anoxaemic, in chronic pulmonary tuberculosis, The acute and chronic, 447
Cardiovascular reactions following adrenalin injections in tuberculosis patients, Composite curves of, 626
Carlo Forlanini and the contribution of the Italian school to pulmonary collapse therapy, 101
CARROLL, WILLIAM E., AND GIBSON, COLE B. Pneumonography as a diagnostic aid in children, 26
Cavity, pulmonary tuberculosis with, duration of life in, The, 412
——, tuberculous, fate of, The, 596
Cervical and abdominal lymph nodes, calcified lesions in the tracheobronchial, The relative incidence of, 336
Chemical study of bacteria, The. XXIII. Comparative yields of water-soluble protein and carbohydrate from tubercle bacilli from various sources, 505
Children, diagnostic aid in, Pneumonography as a, 26
—— known to be tuberculous, pleural lesions as shown by roentgenographs in, The incidence of, 404
——, Miliary tuberculosis in, 392
China, Tuberculosis in, 323
Chronic anoxaemic cardiac syndrome in chronic pulmonary tuberculosis, The acute and, 447
—— pulmonary tuberculosis, acute and chronic anoxaemic cardiac syndrome in, The, 447
Classifying tuberculosis into types, Exudative and proliferative processes not a basis for, 580
Climate in the treatment of pulmonary tuberculosis, 523
Clinical diagnosis of pulmonary tuberculosis, Remarks on the, 37
—— phthisiogenesis, X-ray evidences of allergy and, The, 590
—— tuberculosis, What is, 570
Collapse, Massive, (atelectasis) associated with pulmonary tuberculosis and tumor, 7
—— therapy, pulmonary, Carlo Forlanini and the contribution of the Italian school to, 101
Combined myxoedema and tuberculosis, 444
Comparative yields of water-soluble protein and carbohydrate from tubercle bacilli from various sources. The chemical study of bacteria. XXIII, 505

Composite curves of cardiovascular reactions following adrenal injections in tuberculosis patients, 626
Contribution of the Italian school to pulmonary collapse therapy, Carlo Forlanini and the, 101
COOPER, ALEXANDER T. Results of heliotherapy in pulmonary tuberculosis, 66
CORPER, H. J., AND UYEI, NAO. The fate of tubercle bacilli in various organs, 672
Cracked-pot tympany, Necropsy findings under, 202
Critique on artificial pneumothorax in pulmonary tuberculosis, A, with special reference to mobility of the mediastinum, 117
Cultivation of the tubercle bacillus, Further studies on the, 661
CUNNINGHAM, R. S., CAMP, WILL, LUTON, F. H., AND TOMPKINS, EDNA H. Studies on acid-fast microörganisms. III. The reactions of the white blood cells of the guinea pig following inoculation with human tubercle bacilli, 462
Cycle, developmental, of the tubercle bacillus, The, as revealed by single-cell studies, 815

Death-registration states, Tuberculosis mortality in the original, 687
Degenerated tubercle bacilli, The regeneration of acid-fastness in apparently, 630
DETRANA, GEORGE E., AND HILLEBRAND, JOHN, G. Composite curves of cardiovascular reactions following adrenalin injections in tuberculosis patients, 626
Developmental cycle of the tubercle bacillus as revealed by single-cell studies, The, 815
Diagnosis of pulmonary tuberculosis, clinical, Remarks on the, 37
—— —— —— ——, laboratory, Remarks on the, 51
Diagnostic aid in children, Pneumonography as a, 26
DICKEY, LLOYD B., AND GARLAND, L. H. The incidence of pleural lesions as shown by roentgenographs in children known to be tuberculous, 404
Distribution of valves and first appearance of definite direction in the drainage of lymph in the human lung, The, 360
Drainage of lymph in the human lung, first appearance of definite direction in the, The distribution of valves and the, 360
Dunn, William LeRoy. Obituary, 720
Duration of life in pulmonary tuberculosis with cavity, The, 412

Education, health, Tuberculosis prevention and, 264
Enteritis, tuberculous, Pathological studies on, 744
EVANOFF, MAX, AND SWEANY, HENRY C. Further studies on the cultivation of the tubercle bacillus, 661
Evolution of the modern treatment of pulmonary tuberculosis, The, 794
Experimental tuberculosis, preparations of oleum jecoris in, The vitamine action of, 458
Explaining artificial pneumothorax to the patient, 114
Exudative and proliferative processes not a basis for classifying tuberculosis into types, 580

Factors in the pathogenesis of tuberculosis, 208
FARRELL, JOHN T., JR. The incidence of roentgenographically observed calcified pulmonary foci and their significance, 344
Fate of the tuberculous cavity, The, 596
—— —— tubercle bacilli in various organs, The, 672
Filterability of the tubercle bacillus, The, 823
First appearance of definite direction in the drainage of lymph in the human lung, The distribution of valves and the, 360
FISCHEL, KARL. Indications for thoracoplasty, 551
Flocculation test for tuberculosis, Vernes, The, 513
—— ——, resorcinol, for activity in tuberculosis, The, 843
Foci, calcified pulmonary, The incidence of roentgenographically observed, and their significance, 344
Forlanini, Carlo, and the contribution of the Italian school to pulmonary collapse therapy, 101
Fractions of tubercle bacilli, Immunologica studies on various, 497

FRASER, F. H. The relative incidence of calcified lesions in the tracheobronchial, cervical and abdominal lymph nodes, 336
FROBISHER, MARTIN, JR., AND THOMPSON, WILLIAM P. The filterability of the tubercle bacillus, 823
Further studies on the cultivation of the tubercle bacillus, 661

GALDSTON, IAGO. Tuberculosis prevention and health education, 264
GARLAND, L. H., AND DICKEY, LLOYD B. The incidence of pleural lesions as shown by roentgenographs in children known to be tuberculous, 404
General remarks on hypotensive artificial pneumothorax, and especially simultaneous bilateral pneumothorax, 109
GIBSON, COLE B., AND CARROLL, WILLIAM E. Pneumonography as a diagnostic aid in children, 26
